Dear **Hiring Committee**,

I am writing to express my enthusiasm for the New Grad Engineer position at Western Digital as part of your New College Graduates (NCG) Program. Currently in my final semester of a Bachelor's degree in Control System and Instrumentation Engineering (Automation Engineering International Program) at King Mongkut's University of Technology Thonburi, I am passionate about the future of advanced technology and excited for the opportunity to begin my engineering career with an innovative global leader.

Throughout my academic and internship experiences, I have developed strong foundations in automation systems, PLC programming, electronics, and robotics. My internship at TN Group Corporation exposed me to real-world automation applications, including programmable control, servo systems, and customer-centered problem solving. In my senior project, I applied Generative AI techniques to automate ESG assessments, demonstrating both technical innovation and a commitment to meaningful impact.

Western Digital's NCG Program aligns perfectly with my career goals — offering not only hands-on experience, but also mentorship, networking, and exposure to cutting-edge technologies such as semiconductors, hard disk drives, and advanced manufacturing. With skills in Python, C/C++, MATLAB, and hands-on familiarity with sensors and automation tools, I am confident in my ability to contribute to your team and grow within your global ecosystem.

I am highly motivated, adaptable, and ready to take on the challenges and responsibilities that come with this role. Thank you for considering my application. I would welcome the opportunity to contribute to Western Digital's innovation and excellence.

Sincerely,

Wanwisa Sakchaiyan
